No. 1 of 3 Copies, SeriesTHE SECRETARY OF ENERGY
WASHINGTON, D.C. 20585

Executive Registry

84 - 9158

October 4, 1984

Honorable William J. Casey
Director
Central Intelligence Agency
Washington, D.C. 20505

Dear Mr. Casey:

A year ago we discussed the need to strengthen the Department of Energy's (DOE) intelligence program and the need for an experienced senior manager to develop and manage an enhanced DOE intelligence effort. In response to my request for assistance, you provided [redacted] from the Central Intelligence Agency (CIA) to perform this important leadership role. (U)

25X1

During this past year, I feel that [redacted] has done an excellent job as my Senior Intelligence Officer and as the Department's principal representative to the Intelligence Community. He designed and implemented a new Intelligence organization for the Department and served as the Deputy Assistant Secretary for Intelligence at the head of that new organization, recruited fourteen new people into the Department's intelligence effort, and testified before Congress both on the Department's intelligence program and on developments in the Persian Gulf which could affect world oil supplies. He has also caused the Department's main intelligence requirements to be reflected in the National Intelligence Topics (NITS) and to be better articulated before the various Intelligence Community Collection Committees. (U)

25X1

Accordingly, I would like to request your agreement to extend [redacted] reimbursable detail to the DOE for another year. If you agree, I will ask him to focus the DOE's intelligence effort on two areas of great concern to me. First, I want him to work to improve the Department's ability to detect, process, and analyze foreign events which could lead to an oil supply disruption. To this end, I will ask him to develop and coordinate the implementation of an Intelligence and Crisis Management Information System which can rapidly and automatically process and disseminate intelligence and other time-sensitive information within the Department. Second, I will ask him to work with the Intelligence Community collection agencies to improve our knowledge of Soviet nuclear weapons designs and capabilities. Both Secretary Weinberger and I are very concerned about possible enhancements in the Soviet nuclear arsenal which could be used to counter President Reagan's Strategic Defense Initiative or to provide the Soviets with similar capabilities. Both these areas are now well covered in your current NITS, and I greatly appreciate your support in getting these important requirements before the Intelligence Community. More collection is needed, however, especially to determine what goes on inside the Soviet nuclear weapons complex. (S)

December 7, 1983

Honorable William J. Casey
Director
Central Intelligence Agency
Washington, D.C. 20505

Dear Mr. Casey:

I appreciate your staff's personal attention and timely response to my request for assistance by providing [redacted] to serve as the Department of Energy Senior Intelligence Officer. My staff advises me that the benefits of his presence can already be seen and that these benefits will not only accrue to the Department but with the entire Intelligence Community as our efforts are enhanced and coordinated with the efforts of other agencies.

STAT

[redacted] will be the Department's principal representative to the Intelligence Community and accordingly, I am designating him vice Assistant Secretary Herman Roser as the Principal representative to the National Foreign Intelligence Board and the National Foreign Intelligence Council. Correspondence from the Community to [redacted] should be addressed to:

Director of Global Issues

SUBJECT: Proposed DCI Response to Energy
Secretary Hodel

1. Action Requested: Your signature on the attached reply to Secretary of Energy Hodel's letter to you of 16 September 1983 requesting assistance in identifying a suitable candidate to serve as the Department of Energy's Senior Intelligence Officer.

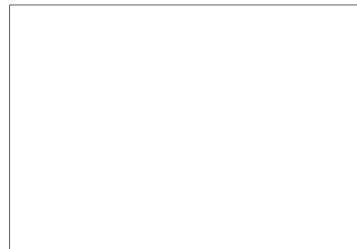

2. Background: We have been in contact with Earl Gjelde, Special Assistant to Secretary Hodel to determine the Department of Energy's needs in the position of Senior Intelligence Officer. Based on those conversations, we have proposed that [Redacted] currently Chief of the Strategic Resources Division of OGI be sent to DOE on a one-year rotational assignment with the possibility of an extension for another year. Mr. Gjelde has agreed to this proposal. Subsequently, [Redacted] met with Secretary Hodel who finds him acceptable for the position. We have discussed these arrangements with Walt Elder on the IC Staff who has no trouble with them.

The Honorable Donald P. Hodel
The Secretary of Energy
Washington, D.C. 20585

Dear Don:

After recent discussions between [redacted] of the Office of Global Issues and Earl Gjelde of your staff, I have agreed to provide an officer on rotational assignment to the Department of Energy to serve as your Senior Intelligence Officer. The officer we are proposing for this assignment is [redacted], the current Chief of the Strategic Resources Division in the Office of Global Issues. [redacted] currently supervises the Agency's energy intelligence effort and has had three years of previous experience with the Department of Energy in the intelligence field. I believe that you will find him able as your representative to the Intelligence Community.

Sincerely,

/s/ William J. Casey

THE SECRETARY OF ENERGY
WASHINGTON, D.C. 20585

September 16, 1983

Honorable William J. Casey
Director
Central Intelligence Agency
Washington, D.C. 20505

Dear Mr. *Bill* Director:

Thank you for taking the time to listen to some of my concerns with regard to the intelligence needs of the Department. Enclosed you will find a brief statement of the criteria I believe the Department's Senior Intelligence Officer should possess.

As I am sure you are aware, Executive Order 12333 designates the Department of Energy as a participant in the Intelligence Community. I sincerely believe that the Department has much to offer other Community members through the economic and technical analytical assets of both DOE Headquarters and national laboratory personnel and programs. I am equally as certain that the Central Intelligence Agency and other Intelligence Community agencies have a wealth of information that is vital to the fulfillment of my responsibilities.

I appreciate any assistance you may be able to provide and I look forward to hearing from you. Should I not be available, please contact Earl Gjelde, my Special Assistant for Policy and Programs at 252-6230.

Sincerely,

DONALD PAUL HODEL

Criteria for Department of Energy Senior Intelligence Officer (SIO)

- o Credibility and status in the Intelligence Community
 - Represent the Department at senior Intelligence Community meetings
 - Satisfy the information requirements of the Secretary and the Department's programs
 - Contribute to the needs of other Intelligence Community member agencies
- o Management and Organizational Abilities
 - Develop an organizational structure for satisfying diverse intelligence requirements of the Department
 - Coordinate DOE Headquarters and Field (national laboratory) intelligence activities
 - Ensure timely presentation of oral and written information to the Office of the Secretary , the Assistant Secretaries or their designees.
- o Awareness of national collection and analytical assets for economic and technical information to address the following issues:
 - World energy markets (i.e. industry production and supply capabilities and threats to market activities);
 - Opinions and strategies of other Governments on energy and energy-related issues;
 - Nuclear and advanced weapon design and testing programs;
 - Nuclear non-proliferation; and
 - Nuclear and non-nuclear energy technologies.

83-01311

Mr. John N. McMahon
Deputy Director
Central Intelligence Agency
Washington, D.C. 20505

Dear Mr. McMahon:

Thank you for your letter to Deputy Secretary W. Kenneth Davis of January 11, 1983, concerning staffing for the Department of Energy (DOE) Headquarters Intelligence element. Dr. Davis has subsequently resigned; hence as the Department's Senior Intelligence Officer, I welcome the opportunity to apprise you of the status of staffing in our Intelligence activity.

The Department found it necessary to provide adequate staffing for several mandated programs in FY 1983 having Congressionally directed employment levels. As part of that augmentation process the Department slowed the hiring rate in areas with significant vacancies to provide staffing in the areas of shortage. The Office of Management and Budget had only recently in FY 1983 authorized an increase in the DOE intelligence area so many of the intelligence full-time equivalents were vacant and hiring could be slowed.

Because the reduction affects only FY 1983 manpower, this situation should be viewed as a hiring deferral, not a staffing reduction. Please be assured that we remain committed to adequate staffing for the Intelligence organization and to provide manpower at levels which ensure the discharge of DOE's full responsibilities. Presently we have 25 positions filled and have several other positions about to be filled. During the remainder of this fiscal year, we will fill intelligence vacancies on a priority basis, utilizing other Defense Programs organizations staffing ceilings so that we can be fully staffed soon after the end of FY 1983.

I will keep you informed of any significant developments concerning this matter.

Sincerely,

for Herman E. Roser
Senior Intelligence Officer

CONFIDENTIAL

The Deputy Director of Central Intelligence

Washington, D.C. 20505

Mr. W. Kenneth Davis
Deputy Secretary
Department of Energy
Washington, D.C. 20585

11 JAN 1983

Dear Mr. Davis:

Over the past several years, the Department of Energy's intelligence organization has undergone significant fluctuations in both the emphasis given to certain intelligence functions and in its staffing level. In September 1981, the then DDCI (Admiral Inman) responded to your request to review the role of the Department in the Intelligence Community, and in outlining his recommendations suggested that a staffing level of approximately 35 positions would be needed to fulfill effectively DOE's intelligence functions. With the consolidation of intelligence responsibilities under the Assistant Secretary for Defense Programs, it was the DCI's hope that the intelligence organization would be able to experience the stability necessary to develop a mature intelligence program. [redacted]

25X1

On December 3, 1982, the DCI wrote to Mr. Stockman to ensure that the Department of Energy's intelligence organization received fair consideration during the recent budget decisions. As a result of that letter, OMB made available a total of 32 FTEs, specifically designated for intelligence, to properly support the National Foreign Intelligence Program (NFIP) both in FY 1983 and 1984. [redacted]

25X1

I now understand that in an attempt to reconcile OMB and congressionally mandated FY 1983 manpower guidance, DOE apparently will need to reallocate a substantial fraction of the specified intelligence positions (seven out of 32 FTEs) to staff certain non-intelligence functions. My responsibilities for ensuring that the various members of the Intelligence Community have the resources necessary to fulfill their Community responsibilities motivate me to request your assistance in assuring that the FY 1983 and FY 1984 staffing level for the Department's intelligence organization will continue to support the DOE portion of the NFIP as approved by the DCI and OMB. [redacted]

25X1

Please keep me informed of any developments in this matter. [redacted]

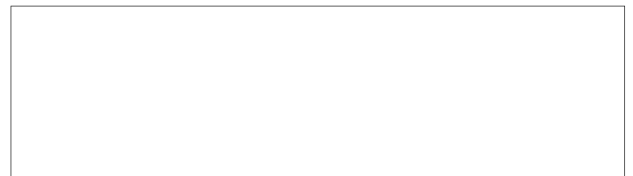

25X1

Sincerely,

/S/ John N. McMahon

10 January 1983

MEMORANDUM FOR: Deputy Director of Central Intelligence

FROM:

Director, Intelligence Community Staff

25X1

SUBJECT: Possible Loss of DOE Intelligence Positions

1. Action Requested: That you sign the attached letter to Mr. W. Kenneth Davis, Deputy Secretary, DOE.

2. Background:

- o In the FY 1984 budget cycle, Defense Programs submitted a 38 FTE intelligence organization to OMB for approval.
- o In the initial round of manpower decisions, OMB provided for only 24 FTEs for both FY 1983 and FY 1984.
- o The DCI signed a 12/3/82 letter to Mr. Stockman endorsing DOE's appeal for restoration of the remaining 14 FTEs (attached).
- o As a result of that letter, OMB restored an additional eight FTEs for both FY 1983 and FY 1984. This provided a total of 32 FTEs for both fiscal years.
- o In an attempt to thwart the Administration's plans to downscope certain DOE activities (e.g., fossil, conservation, solar) and to prevent the abolition of DOE, Congress mandated by law that certain minimum staffing levels be maintained by the programs that had been scheduled to be reduced by OMB.
- o In order to reconcile these congressionally mandated manpower "floors" for the solar, etc. programs and the OMB's FY 1983 manpower ceiling, DOE must reallocate positions from programs which were not being downscoped.

This memo is UNCLASSIFIED
when removed from Attachment

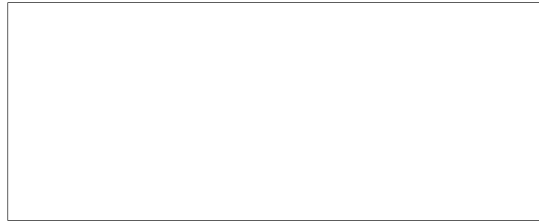

CONFIDENTIAL

CONFIDENTIAL

SUBJECT: Possible Loss of DOE Intelligence Positions

- o In accomplishing this manpower reallocation in FY 1983, DOE is planning to reprogram seven FTEs which had been designated for intelligence to other programs.
- o This letter should be sent soonest, if it is to have any effect on current reapportionment of personnel within DOE.
